Meeting firemen at the fire house (specific socialization, helpful if you are in an auto accident or need medical response or have a fire/emergency so dog doesn't freak out at strange clothes/sounds/smells)	
	Pick a time when Firefighters are not busy or eating/prepping a meal
	If able, do these steps outside in case alarms go off (won't be as loud outside)
	Meet some fire fighters (FF) in regular day uniforms, feed pup treats/play
	Intro to paramedics (in jump suits or other uniforms if available)
	Set turn out pants/jacket on floor and have pup investigate/smell (these can have lots of strange/burnt odors on them. Some may smell more scary than others)
	Have a FF wear the pants and sit on the floor/play with pup
	While sitting on the floor, add the jacket (these are hot to wear so keep session short)
	Have FF stand up, move around, call the pup, play tug
	Remove turn out gear
	Have FF wear different kinds of gloves (these also have strange smells/looks)
	Have pup pet, held by collar, picked up with gloved hands (if not stressed)
	Let pup inspect an air mask and tank laying on the floor
	Have air mask worn- talk to pup while wearing it
	Intro an air tank hiss, start at a distance
	Intro air tank alarms, start at a distance
	Introduce full turn out gear (pants, jacket, gloves, mask, air tank on silent)
	Call pup and give treats/play (sitting/squatting may be less scary than standing)
