

Settle next to me <https://www.facebook.com/watch/?v=1430687788410354>

“Nest” a towel to contain dropped treats so they don’t roll away

Work on this when the pup is already tired and use low value treats/no marker

Get pup to lie down on the towel and drop treats fast enough to keep head down

If pup tries to get food from my hand or stare at my hand, just close my hand & wait

As soon as the pup goes back to sniffing around the towel, drop more treats.

Gradually slow treat delivery and wait for head down on the towel and drop treats for that position.

Keep nose down
with fast treats drops

Don't reward this

Reward this

Practice everywhere!
