

## Do Nothing/Settle

	Arrive at new location and let pup watch from the crate through open door or window for a bit.
	Set up a chair and the pup's mat, then get the pup and go sit in the chair. Pup can explore to the end of the leash, but try not to allow pulling, barking, etc. Redirect
	Have a longer lasting chew or filled/frozen topple or freezebone that can be offered to the dog.
	Can reward settle/relax on the mat
	Around the house you can randomly reward the pup when you see him resting. Just one treat. Food is not always a predictor of exciting stuff
	Teach 'go to place' and wait for any indication of more relaxation and calmly deliver a treat for that.
